A MESSAGE FROM DIRECTOR JEFFREY T. PEARSON

Aloha,

I am incredibly proud to present the Department of Water Supply's Annual Water Conservation Poster Contest Calendar. For 11 years, we have invited children in kindergarten through 8th grade to participate in our annual poster contest. It is an exciting opportunity for children to express their creativity and originality while also demonstrating their awareness of our precious water resources. The 2021 calendar showcases the exceptional artwork of student winners selected from 726 entries from public, private and home-based schools countywide.

We have all experienced a challenging year due to the COVID-19 health emergency. We would like to thank everyone who helped make this year's contest a success despite the new challenges. Mahalo to the teachers, families, judges and staff of our Water Resources and Planning Division for their efforts and commitment in making this project a huge success. Our biggest Mahalo goes to the talented young artists who participated and congratulations to our 2020 Water Conservation Poster Contest winners!

Winning posters can be viewed on our website at www.mauiwater.org.

On behalf of the County of Maui's Department of Water Supply, please enjoy this calendar! Our children hold our future, and we are so proud of their awareness and care for our island home's precious water resources.

Sincerely,

Jeffrey T. Pearson P.E.
Director

Aloha,

The theme for this 2021 water conservation calendar is “Our Water, Our Future, Protect It.” Our Department of Water Supply received 726 entries from very talented student artists to the County of Maui’s 11th Annual Water Conservation Poster Contest. It was a difficult task to choose the very best exceptional artwork to feature in this calendar.

These students show how much our keiki care about water, their island’s precious natural resource. The contest educates Maui County’s youth on the importance of water conservation and encourages each of them to take an active role in ensuring the sustainability of Maui County’s water supply.

Individual responsibility is important in water conservation as it is in the way our community and the County of Maui has responded to the COVID-19 pandemic. I am proud of the way our community has followed health and safety protocols, such as wearing face masks in public, practicing safe physical distancing and avoiding crowds. Together, we will prevail over COVID-19 and emerge stronger than ever, Maui Strong!

On behalf of the people of the County of Maui, congratulations to all these talented students for their artistic achievements. They have made their families, schools and community proud.

Mahalo Nui Loa,

Michael P. Victorino
Mayor, County of Maui

Office of the Mayor
County of Maui

A MESSAGE FROM MAYOR MICHAEL P. VICTORINO

Aloha,

The theme for this 2021 water conservation calendar is “Our Water, Our Future, Protect It.” Our Department of Water Supply received 726 entries from very talented student artists to the County of Maui’s 11th Annual Water Conservation Poster Contest. It was a difficult task to choose the very best exceptional artwork to feature in this calendar.

These students show how much our keiki care about water, their island’s precious natural resource. The contest educates Maui County’s youth on the importance of water conservation and encourages each of them to take an active role in ensuring the sustainability of Maui County’s water supply.

Individual responsibility is important in water conservation as it is in the way our community and the County of Maui has responded to the COVID-19 pandemic. I am proud of the way our community has followed health and safety protocols, such as wearing face masks in public, practicing safe physical distancing and avoiding crowds. Together, we will prevail over COVID-19 and emerge stronger than ever, Maui Strong!

On behalf of the people of the County of Maui, congratulations to all these talented students for their artistic achievements. They have made their families, schools and community proud.

Mahalo Nui Loa,

Michael P. Victorino
Mayor, County of Maui

Our Water, Our Future, Conserve it!
SAVING WATER SAVES MONEY

Conservation INSIDE

- Install faucet aerators with flow rate of no more than one gallon per minute.
- Install low-flow showerheads.
- Turn off faucets when brushing your teeth or when shaving.
- Choose shortened showers over baths.
- Cool drinking water in the fridge, don’t run the tap.
- Thaw frozen food in the fridge or microwave, not under running water.
- Wash only full loads of dishes and clothes.
- Flush toilet only when necessary.
- Don’t use the toilet as a rubbish can.
- Check pipes, faucets and toilets for leaks and fix them right away.

Conservation OUTSIDE

- Choose native plants and/or drought tolerant plants.
- Water lawn only when needed. If you leave footprints when you walk on the grass, it’s time to water.
- Water when the sun is down (to avoid evaporation) and when it’s not windy. Water slowly, deeply and as little as possible.
- Mulch to retain moisture in the soil.
- Use a drip hose instead of a sprinkler.
- Outfit your hose with a shut off nozzle.
- Use a broom, not a hose to clean sidewalks and driveways.
- Wash your car on the grass. You’ll be watering the lawn at the same time.
- Save the rain. Store it for garden watering.

Water moves in a constant cycle, changing form along the way. Every drop on Earth is used over and over again. It’s the same water now as when the dinosaurs were alive.

WATER FACTS

Water covers about 71% of the earth’s surface
97% of the earth’s water is found in the oceans
3% of the earth’s water is fresh
2.5% of the earth’s fresh water is unavailable: locked in glaciers, polar ice caps, atmosphere and soil
0.5% of the earth’s water is available fresh water

</table>
THE WATER CYCLE

AQUIFER - an underground water source.

CONDENSATION - water vapor cooling and becoming liquid.

EVAPORATION - liquid water heating and becoming a gas.

GROUNDWATER - water under the ground that supplies springs & wells.

PERCOLATION - water moving downward through tiny openings.

PRECIPITATION - rain, snow, or hail.

TRANSPERSION - process of water vapor transferring from living plants to the atmosphere.

SURFACE RUNOFF - storm water that runs along the Earth’s surface into lakes and rivers.

WATER VAPOR - water as a gas in the air.
